Product Description

FLEX™ I/O offers all the functions of larger rack-based I/O without the space requirements. Its cost effectiveness, flexibility, modularity, and reliability have made it one of the most popular distributed I/O platforms. FLEX I/O helps eliminate multiple long wiring runs, reduces terminations, decreases engineering and installation costs and time, and substantially reduces down time. It complements all Rockwell Automation® controller platforms for a distributed I/O solution. The FLEX I/O system can communicate on EtherNet/IP, ControlNet, DeviceNet, and many other open networks including, but not limited to, Remote I/O, PROFIBUS DP™, and Interbus-S. You can independently select the I/O, termination style, and network to meet your application needs.

Application

- 1. Power industry, the elevator industry, parking, automobile, auto ancillary.
- 2.feed industry, aluminum smelting machines, refrigeration industry.
- 3.steel industry, combustion control systems, non-ferrous metal smelting.
- 4.glass industry, construction machinery, textile machinery, water treatment
